DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/09/09 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 4 and 34-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Ryan et al. (US 7027975, hereafter Ryan).

Regarding claims 1, 34 and 37, Ryan discloses: a method, a database management system (see col. 7, line 35) and a program product comprising computer readable program code on one or more media, said program code being capable on a

management and configuring a computer system having one or more computers to perform the process of:

- a. receiving queries on a pervasive computing device (i.e., palm III or hand-held devices) in SQL, the queries comprising a plurality of query terms (i.e., see col. 7, lines 40-44; col. 29, lines 10-17; col. 31, lines 23-30; col. 34, lines 35-45);
- b. interpreting the queries on a pervasive computing device by associating at least one declarative language function with the query terms by converting the SQL to an intermediate tree representation (parse tree... col. 9, lines 2-10;) corresponding to the declarative language function (col. 8, lines 1-2; col.8, lines 55-67; col. 25, lines 20-30; col. 26, lines 25-56);
- c. converting the queries represented by at least one declarative language function to a plurality of JAVA statements on a pervasive computing device (i.e., translate xml to internal Java classes..., col. 25, lines 27-32; col. 16, lines 60-65; and
- d. executing the JAVA statements (see col. 32, lines 47-56) .

Regarding claims 3, 35 and 38, all the limitations of these claims have been noted in the rejection of claims 1, 34 and 37 above, respectively. In addition, Ryan discloses: wherein the declarative language function is identified by a pointer reference to further code such that the declarative language function is treated as data within a plurality of JAVA statements (see col. 7, lines 48-50; col. 16, lines 50-65; col. 25, lines 21-31;).

Regarding claims 4 and 36, all the limitations of these claims have been noted in the rejection of claims 1 and 34 above, respectively. In addition, Ryan discloses: wherein the declarative language function is implemented in a declarative language that is chosen from the group consisting of ML, LISP, and HASKELL (col. 25, lines 41-42; col. 32, line 40; col. 38, lines 63-67).
